## GATHER YOUR POWDER POSSE

Picture this. You and your ski buddies are perched atop a serene ridge looking down at a glade of fluffy, chest-deep powder. You high five one another before dropping into what may be one of the best moments of your life, miles from anyone who could potentially take your line. As admitted powderhounds, we know this feeling and we know how to get you there.

Whether you seek the tranquility offered by a faraway mountain lodge, the rush of experiencing up to 20,000 vertical feet of powder skiing via helicopter or you just want to get away from the resort for a day to float through endless, untracked fields of snow, our knowledgeable Mountain Travel Experts can help customize your perfect powder-filled vacation from start to finish.

### HELI-SKIING

If you would like to experience a lodge-based, multi-day heli-skiing vacation or you're interested in enhancing your resort experience by skipping the lifts for a day of aerial-accessed adventure, we can help you decide which operator is best for you and take care of everything.

Keep in mind that heli-skiing isn't just for expert skiers and riders. Advanced intermediates—anyone who is comfortable skiing ungroomed terrain—are able to enjoy a day on the “bird.” Of course, terrain varies by region and by operator, and we are here to help skiers and riders determine which experience is right for them. Give us a call. We offer complete heli-skiing packages in a variety of destinations across the Western U.S., British Columbia, Alberta, Alaska and South America.

### CAT-SKIING

For those of you who have fantasized about riding in style with your favorite skiing posse to enjoy untouched powder, cat-skiing is something that shouldn't be missed. Cat-skiing is perfect if you are interested in guided sidecountry and backcountry powder skiing, but you don't have the budget for heli-skiing or you prefer to stay on the ground to pursue powder. Additionally, in destinations where heli-skiing isn't an option, cat-skiing is an excellent alternative. Through Ski.com, you can book a couple seats or we can reserve the whole snowcat if you have a group of people who want to ski together. Some snowcats are enclosed to keep riders sheltered from the elements, while others feature open-air cabins. Either way, all snowcats offer brag-worthy experiences and long-lasting memories.

# ASPEN COLORADO

In Aspen, you can experience four unique ski resorts in one vacation. Resort hop day after day to enjoy everything Aspen Mountain, Aspen Highlands, Buttermilk and Snowmass have to offer, or opt to keep your focus on downtown Aspen, where you can indulge in fantastic dining, shopping and nightlife, all steps from Aspen Mountain's famously steep slopes. More seasoned schussers are best suited for Aspen Mountain, while beginners and intermediates will thrive on Buttermilk's gentle slopes. Adventure-minded skiers and snowboarders will jump at the challenge to hike to the summit of Highland Bowl and descend 1,460 feet, and just about everyone will find their piece of paradise at Snowmass. # BEAVER CREEK COLORADO

Beaver Creek is synonymous with sophistication, luxury and class. Once you've left behind the bustle of Colorado's main thoroughfare—I-70—and passed through Beaver Creek's natural gateway, you'll be greeted by an overall top-shelf atmosphere, complete with picture-perfect ski runs and a charming Bavarian-style village. The hotels are lavish, foodies love the restaurants and the terrain offers something for every stripe of skier or rider.

Beaver Creek skiing is right in line with the resort's specialty: world-class experiences. Steep, wide-open, blue-square runs are favorites of intermediate skiers, and beginners flock to the looker's left portion of the mountain with long runs to Village Plaza. Challenging advanced skiers, the Stone Creek Chutes area features a handful of rocks to jump off and tight glades. # COPPER MOUNTAIN COLORADO

From its unique, naturally-divided terrain and top-notch terrain parks to its many affordable restaurants and bars, lodging options and family-friendly attractions, Copper Mountain will delight just about any skier, from first timer to expert, young to old, budgeters to those looking to splurge a little.

Copper's terrain is conveniently—and naturally—segmented by difficulty. Almost the entire West Village area is for beginner skiers, the middle area terrain above Center Village is for intermediates, and the runs above East Village are nearly all black. All the above-treeline and bowl skiing is expert to extreme terrain, with the exception of Otto Bahn, the lone blue run in Copper Bowl.

In 2009, Woodward at Copper was developed as an on- and off-snow training facility for terrain park and halfpipe progression. Woodward's on-snow program and trampoline/ramp barn on the outskirts of the East Village base area let you defy gravity and take your Copper Mountain ski vacation to new heights.

# CRESTED BUTTE COLORADO

There's nothing quite like walking around Crested Butte at night when town is bedecked in a blanket of soft, fluffy snow. You can feel the excitement in the air while you wet your whistle in one of the many eclectic bars on Elk Avenue packed with friendly, interesting locals. The promise of a powder day sets the whole town abuzz, and, weather dependent, you could be a part of it.

Crested Butte attracts a certain kind of ski vacationer: someone looking to travel further, go deeper and ski harder. Acclaimed as "the last great Colorado ski town," Crested Butte exudes a spunky individualism that makes a truly one-of-a-kind ski vacation. It's all in the details, from the local history to the idyllic Victorian town and unique ski terrain.

While it's known for its technical, steep "extreme" skiing, the vast majority of Crested Butte's terrain is intermediate to advanced intermediate. The top half of the mountain is a challenge-seeker's delight, while the bottom half levels out to wide-open, ideal beginner and intermediate skiing. Just off the Red Lady Express, the frontside of the mountain offers gentle beginner trails, while runs off Prospect and Gold Link lifts let intermediates enjoy quick laps. More advanced intermediates have tons of options off Paradise and East River lifts, and experts can indulge their need for extreme off the North Face Lift and gate-accessed Teocalli Bowl and Paradise area. Few resorts can boast such varied, world-class terrain.

# BIG SKY RESORT MONTANA

Boasting the title of the U.S.' second largest ski resort, Big Sky Resort offers mixed terrain on its incredible 5,800 acres and a laid-back mountain setting. Off the slopes, great experiences abound with a range of slopeside lodging and world-class amenities in the Mountain Village, where everything is within walking distance of the lifts.

In 2013, Big Sky Resort purchased its neighbor, Moonlight Basin ski resort, which shares the iconic Lone Peak. Now skiers and snowboarders can easily explore both areas via interconnected lifts and trails on one ticket. Novices can hone their skills in a beginner area between Moonlight Basin's Pony Express and Derringer lifts, while intermediates and experts explore the surrounding eight square miles of runs off the Lone Peak Tram. The difference is in the details, and Deer Valley excels in offering world-class amenities, picture-perfect slopes, award-winning cuisine and guaranteed short lines. Whether you explore bowls, moguls or corduroy cruisers, you'll feel like you have the mountain all to yourself. The terrain, featured in the 2002 Olympics, is evenly divided to provide something for everyone and ensures that every skier (sorry, no snowboarding allowed) has miles of slopes to enjoy.

Complementing the extraordinary skiing are a host of on- and off-mountain activities ranging from snowmobiling tours with s'mores and Nordic skiing to horse-drawn sleigh rides and dog sledding. Deer Valley is conveniently located a few miles from Park City's historic Main Street, and Salt Lake City is only 45 minutes down the road.

# JACKSON HOLE WYOMING

Jackson Hole Mountain Resort has been the proving ground for expert skiers since its inception in the '60s. The terrain is recognized worldwide as some of the most challenging and rewarding, featuring iconic chutes, cliff drops, deep snow and steep lines on expert and advanced runs. However, recently regraded terrain now makes Jackson Hole an ideal destination for intermediates as well. The Casper lift accesses wide-open trails perfect for cruising corduroy.

Skiing in Jackson Hole is like skiing in the clouds. The mountain often experiences inversions, where cold air is trapped by clouds at the base, providing the top half of the mountain with gorgeous, sunny views. Fun for all ages, Jackson Hole's Mountain Sports School provides lessons and camps tailored to every skill level.

Rich in history, the resort is home to the iconic Aerial Tram, which carries passengers up 4,139 vertical feet in just 12 minutes. Its slopes have bred many ski legends, including Doug Coombs, and many of the iconic, expert runs are featured in ski movies year after year.

The town of Jackson offers an eclectic mix of world-class cuisine, shops and galleries infused with authentic cowboy character. Western culture carries throughout every aspect of a Jackson Hole ski vacation, from the famed Million Dollar Cowboy Bar in downtown Jackson to the ski-in/ski-out Teton Village, located just 15 minutes apart. Rounding out your Western adventures, Yellowstone National Park, Old Faithful, Grand Teton National Park and the National Elk Refuge are all within striking distance of Jackson Hole.

# BANFF AND LAKE LOUISE ALBERTA

With three resorts to choose from—Mt. Norquay, Lake Louise Ski Area and Sunshine Village—and some of the world's most spectacular scenery, Banff and Lake Louise are sure to please every type of skier. Located in the protected wilderness of Banff National Park, Banff and Lake Louise offer remote beauty for those in search of serenity and quiet. Plus, their inland locale—on the border of interior British Columbia and Alberta—ensures great snow conditions. The town of Banff is the gateway to Canada's oldest national park—a UNESCO World Heritage Site, which offers visitors nearly 1.5 million acres of unspoiled forest to discover.

Every level of terrain can be found on a Banff and Lake Louise ski vacation. Mt. Norquay, which is located just minutes from the town of Banff, is considered a family-friendly resort and offers weekend night skiing for those who just can't get enough time on the slopes. Boasting 4,200 skiable acres, Lake Louise Ski Area takes the cake for "big" skiing in the Banff area, and it boasts the most convenient location. The Village at Lake Louise, which features restaurants and lodging options, is just minutes from Lake Louise Ski Area. Sunshine Village is nestled in Banff National Park and just 15 minutes from the town of Banff. It sits higher up than the other two resorts, affording the chance to not only ski and ride on the Continental Divide, but also in two Canadian provinces: Alberta and British Columbia. Because of its slightly higher elevation and remote location, Sunshine often gets the most—and fluffiest—snow of all three.

# SKI JAPAN

Thanks to a host of recent ski and snowboard films showcasing Japan's deep snow conditions, the Land of the Rising Sun is quickly becoming one of the most sought-after destinations in the world for powder skiers and riders.

Sea-effect snow, caused by cold winds from Siberia meeting the Sea of Japan, make for incredibly deep powder skiing. Japanese ski resorts receive anywhere from 350 to 800-plus inches per year, but there have been some winters where 1,200-plus inches of snow have been recorded.

In addition to having a growing reputation as the best place to go for deep powder skiing, Japan is also known for its glades. Birch trees are sacred to the Japanese and extremely prominent in Hokkaido's mountains. Since most Japanese resorts still fly under the radar for most international ski travelers, you'll often be the only one skiing through the many miles of powdery glades.

Despite being a half a world away, Japan's ski resorts are quite modern. Skiing in Niseko dates back to the 1960s, which is on par with when many North American resorts began operation. In Japan, you'll find contemporary chairlifts, many with hoods, and state-of-the-art facilities and programs, including many English-speaking ski instructors and guides and childcare.

## Where to go

Hokkaido, Japan's northern island, is where the historically deepest snow can be found. The resorts are anywhere from a 30-minute to a three-hour drive from The New Chitose Airport, making it a surprisingly easy ski region to access once you've landed. In addition, top resorts are close to one another, so it's very common to enjoy more than one destination on a Hokkaido ski trip.

On the larger main island of Honshu, skiers and riders have world-class options in the Japanese Alps, which was where the 1998 Winter Olympics were held. Just a couple miles from the mountain city of Nagano sits Hakuba Valley. Comprised of 11 resorts offering 200-plus trails, Hakuba has something for every ability level, but powderhounds will specifically love Cortina for its deep sidecountry skiing.

A Japanese Alps ski trip is especially ideal for the traveler who wants to experience Tokyo, too. It's actually quite easy to hop on a bullet train from Tokyo and be in the mountains within four hours.

If deep snow, delicious food and a whole new cultural experience sound like your kind of ski vacation, make your next trip to Japan.

# FURANO JAPAN

Located in the geographic center of Hokkaido and two hours from Sapporo, Furano provides the perfect basecamp to experience a variety of skiing experiences, including resort groomers and the uber-deep powder that Japan is known for. Furano isn't overly developed, but it offers two full-service hotels and English-speaking snowsports instructors. The nearby town provides more than 100 affordable, authentic restaurants.

Staying in Furano makes it easy to experience the controlled inbound terrain of the Furano ski resort or nearby Tomamu or Kamui. Additionally, adventurous powderhounds can enjoy lift-served backcountry skiing on Asahidake (an active volcano).

# HAKUBA JAPAN

Located in the Japanese Alps near Nagano, Hakuba Valley features a number of ski resorts, 11 to be exact, and attracts international skiers. Hakuba enjoys about 36 feet (11 meters) of snow on average every winter.

While the resorts aren't connected via slopes, with the exception of Hakuba 47 and Goryu and Cortina and Norikura, there is a shared lift ticket option and shuttle buses make it easy to get to and from. Combined, the Hakuba Valley resorts offer skiers 85 miles (137 km) of terrain, 200-plus trails and 135 lifts.

All the Hakuba resorts offer ideal beginner and intermediate slopes, and there are moguls aplenty plus nine different terrain parks. However, if you're seeking powder, be sure to head to Cortina, which takes a more relaxed approach to tree skiing. # NISEKO JAPAN

Located on the southern peninsula of Hokkaido island, Niseko is the largest and easily Japan's most famous ski destination. Receiving 595 inches of snow on average per season, Niseko is truly the powder paradise it's rumored to be. But it's not only Niseko's powder that's the best in Japan; for expert skiers and riders, nothing competes with Niseko's off-piste sidecountry skiing. Out-of-bounds adventuring is permitted thanks to a relaxed ski-patrol policy at Niseko, in comparison to other Japanese resorts. Guides are available and recommended, especially if you aim to climb and ski or ride the backcountry terrain on Mt. Yotei.

Located 62 miles from bustling Sapporo, Niseko is quite accessible for both international travelers and for city sight-seers.
